

## Pain Management

University Pain Clinic understands the complex needs and problems associated with the treatment of chronic pain. Chronic pain is often associated with other medical conditions and affects many areas of a patient's life.

The University Pain Clinic recognizes the physiological aspects of pain, as well as the social and psychological dimensions and their impact upon a patient's life.

## Our Services

The University Pain Clinic is dedicated to and focused on the diagnosis, treatment and management of patients with chronic pain. We are committed to helping patients achieve their optimum functional ability and quality of life. This is done through the coordinated efforts of a specialized multidisciplinary team of professionals with extensive pain management training and treatment plans that are specifically tailored to the needs of the individual patient, to treat the following conditions:

- Accident pain
- Back, neck, abdominal, pelvic, hip, leg, muscle and head pain
- Complex regional pain syndrome Type I and II (RSD & causalgia)
- Diabetic neuropathy
- Facet pain
- Myofascial pain
- Arthritis pain
- Post laminectomy/failed back surgery syndrome
- Sciatica
- Spinal stenosis
- Trigeminal neuralgia
- Vertebral compression fractures
- Cancer pain
- Postoperative chronic pain
- Phantom limb pain

Living with chronic pain is difficult for both the people who are experiencing it and their families.

University Pain Clinic is the first step in gaining control of pain and regaining control of life.

**Don't live with pain. Treat it.**

Pain can affect our lives in many ways, from the subtle to the significant.

We work with patients to carefully, safely manage pain,  
so that it does not manage you.

## Our Professional Staff is the Best in the Business:

Samir F. Fuleihan, MD  
Medical Director

Dr. Fuleihan is a graduate of the American University of Beirut and completed his residency at Harvard Medical School. He is board certified with the American Board of Anesthesiology, and Pain Medicine.
